MEDICAL PHYSICS SEMINAR SERIES

Frank Ranallo, PhD

Professor, Departments of
Medical Physics & Radiology
University of Wisconsin-Madison

Monday, October 25, 2021 4:00PM (CT) via Webex medphysics.wisc.edu/seminars

Radiation Dosimetry in Computed Tomography

CT uses a set of radiation concepts and quantities that are additional to the conventional ones. The seminar will address the following questions:

- How are these CT radiation quantities properly defined and properly measured?
- What are the problems in their measurement?
- How are they used and how do they relate to patient radiation dose and risks?
- How is the expression of patient dose confusing -- to the patient, physician, radiologist, technologist, and medical physicist?
- How is it sometimes improperly used in published papers and reports?
